100% NATURAL & 100% COMPOSTABLE**

- Cleaner and greener healthcare
- Cost benefit to hospitals via saving in electricity, water and nursing time
- Increased caregiver dignity

# HYGIENE

New millennium healthcare with SterEco's 100% Natural and 100% Compostable disposable medical containers: Green, clean and completely safe.

SterEco products have passed the stringent EC 1935-2004 and US FDA 21 CFR 176.170 tests for safety and hygiene.

Hospitals, clinics and homes use and dispose SterEco medical containers safely and easily without the risk of infection spreading to a caregiver or another patient because of improper disinfecting of a used medical container.

The benefits are life saving because SterEco disposable medical containers do not create a chain of infection as reusable medical containers

do. This ensures safety both for the healthcare worker as well as the patient, in turn translating to high caliber health care.

Infection control is a matter of worldwide concern and SterEco addresses this effectively by removing any need for disinfectors which could leave behind infections on plastic and stainless steel. Instead, a new product is provided each time which can be completely destroyed after use, leaving the planet cleaner and avoiding the slightest possibility of any infection being passed on.

# ENVIRONMENT

SterEco disposable medical containers have been proved to be 100% bio based as per **ASTM D6866-12** (American Society for Testing and Materials).

SterEco products ensure that there is no wastage of energy or water as is the case with re-usable medical containers. This adds up to significant savings for hospitals as well as the planet. The container can be simply disposed off in a shredder / macerator after use.

SterEco's disposable medical containers are 100% natural and 100% compostable, therefore completely safe for the environment. They are made from leaves that are shed naturally, so the entire SterEco experience is environment friendly, from start to finish.

Additionally, the absence of any bleach, colour, binders or coatings guarantees that the medical containers are environmentally safe for disposal.
